

Appropriate Equipment Usage Audit

For Customers;

- Do your staff really understand what type of pressure redistributing equipment should be prescribed for individual patients?
- Do you feel there may be an overuse of dynamic mattresses?
- Do you need help to build a clear equipment selection process?
- Do you need help building knowledge of specialist equipment?
- Do you need help to decide if the mattresses and beds currently in use are fully suitable for your patients?

Drive DeVilbiss Audit Services can provide you with:

Appropriate Equipment Usage Audit

This audit looks at the type of support surface being used to nurse individual patients and whether this is suitable for each individual's needs. The audit identifies requirements against individual customer equipment selection guidance and is a key audit to identify 'step down' opportunities. Drive DeVilbiss Healthcare understands the constraints involved with appropriately managing your equipment while maintaining patient care. Our dedicated and professional audit service assist in alleviating these pressures and provide customers with a thorough assessment of processes and equipment from infection control, patient welfare and appropriate use perspectives.

In addition;

Drive DeVilbiss Audit Services can provide you with:

- Training and education in how to carry out regular static mattress checks and mattress cleaning and care advice and guidance.
