Community & Long Term Care Bed Range
Drive DeVilbiss Healthcare is one of the leading manufacturers and distributors of medical devices throughout the world.

With a strong commitment to UK manufacturing the company invests continuously in a comprehensive product range, working to enhance quality of life for people across all healthcare markets.

Electric profiling beds designed and manufactured by Drive DeVilbiss Healthcare for the community market have been developed specifically to meet the very individual challenges of this environment. With a build design focused on quality, they are safe, reliable, easy to transport, simple to assemble and disassemble and easy to use for both the patient and care giver.

The community and long-term care bed range includes a comprehensive portfolio of products developed for differing requirements, including specialist bariatric and paediatric models.

Focus on safety and compliance

Drive DeVilbiss Healthcare is totally committed to conformance and quality. In-house testing facilities and extensive field trials ensure that all beds are designed and manufactured in compliance with IEC 60601-2-52, the most stringent standard governing the safety and performance of medical beds.

Drive DeVilbiss Healthcare community beds also comply with additional important standards including IEC 60601-1-11, which governs medical electrical equipment and systems used in the home healthcare environment.
From the sophisticated, stylish Belvedere bed through to the simple Casa FS, we have developed a full range of long term care beds designed for the nursing, residential and care environments. Our range includes electrically operated, fully profiling nursing beds to entry level fixed height divan beds to meet all residents and Care Home needs.
Belvedere Beds

Features & Benefits

The Belvedere bed is an electrically operated, fully-profiling nursing care bed that has the appearance of an attractive home-style bed but with added safety of side rails to meet the needs of the nursing and residential care home environments. Available in a wide range of wood and head board pad colour options to suit all décor and interiors.

- Interchangeable head and foot ends allow the bed to go from a stylish bed into a nurse care bed easily to meet all the needs of the resident. By turning the head board to reveal the side rail channels, and adding a high footboard and side rails, Belvedere is transformed into a true nursing care bed.
- 6 wood finishes are available, the standard finish is light oak. Different colour head board pads to suit individual tastes and décor.
- Full length integral side rails with our patented unique design focuses on both in bed safety and easier ingress and egress for the resident.
- Ingress and egress dip on the side rails reduces pressure on the back of the legs.
- No visible side rail channels when in the home-style variance.
- Removable low foot board supplied as standard; sitting just above the mattress for improved resident visibility.

Bradshaw Nursing Care Beds

Features & Benefits

The Bradshaw Nursing Care range encompasses standard, low and wide version beds to accommodate individual needs. These four-section beds are designed to be strong and durable for the nursing, residential care and community environments.

- Electrically operated variable height to assist the work of the carer by reducing lifting and handling but also assists the client when getting in and out of bed.
- The Bradshaw Beds break down into four-sections and can be disassembled, cleaned and stored easily on transport stands.
- The side rails provide additional safety through the two-stage unlocking mechanism which reduces the potential risk of accidental release.
- Enhanced domestic appearance with attractive rounded and covered head and foot ends in a choice of finishes. Standard finish of the Bradshaw Nursing Care beds is light oak.
- Full range of supporting accessories are available.

Community & Home Care Beds

From the UK manufactured Splitte Pro with patented side rails for easier ingress and egress, to the popular, easy to use Casa Nuova III, we have a range of reliable and durable community beds to meet home care needs. Low bed options are also available in both models for those users at risk of falling out of bed.
The Solite Pro bed range is designed and manufactured in the UK. Our design brief was simple; to create a high quality, reliable, durable bed to meet patient needs at home. This electrically operated, 4 section profiling bed features a built in auto regression function, and transport stand storage locators. The optional patented side rails can be added for complete in bed safety whilst ensuring easier ingress and egress for the patient.

- The auto-regressing backrest mimics the spinal movement of a patient when profiling the bed
- Built-in integral leg extension for taller patients, including auto stop for added safety
- Corner locking mechanism for easy assembly and disassembly; no tools required
- Full compliance to EN60601-2-52 and EN60601-1-11 and externally certified by TUV
- Available in standard and low height options
- In-built transport stand storage locators
- Full range of supporting accessories are available

The Casa Nuova III is an electrically operated, 4 section profiling bed designed to be simple and easy to use.

- **Standard height of 40-80cm enables Carers and Nurses to care for users without bending and causing back injuries**
- **Low variable height ensures a safe resting and sleeping environment for those at risk of falling out of bed**
- **Integral, adjustable and self-locking full-length side rails ensure optimum occupant safety, which can be released at both the head and foot ends, or can be removed completely if required**
- **Dual action headrest and knee brake adjustment on handset, to help reduce shear when profiling**
- **Electric and manual lower leg section levelling device**

Specialist Care Beds

Our specialist care bed range has been developed to accommodate all requirements, from bariatric beds through to junior and petite beds. These specialist beds can be used in many different settings including nursing and long term care, community and home, mental health units and general wards.
Features & Benefits
The Bradshaw Bariatric beds are specially designed to cater safely for patients weighing up to 318kg (50st) in the community, nursing and residential care environments.

- Robust and sturdy electrically operated 4 section profiling care bed, designed specifically for plus size patients
- Profiling action enables backrest and knee break sections to operate in harmony reducing shear and friction, using the one button auto contour positioning control
- The side rails provide additional safety with a two-stage unlocking mechanism which reduces the potential risk of accidental release
- Attractive domestic appearance with high quality wooden head and footboards and full length integral wooden side rails
